X431 Diagon

The all new Launch X-431 Diagon is an ultra compact fully featured diagnostic scan tool. Combining all the Diagnostic functions of the X-431 Master in a handset measuring only 13.5cmX5.5cm, the Diagon truly is a go anywhere use anywhere tool.

The Diagon handset features a 4.3in (110mm) high luminance colour touch screen, the communication hub fits all standard 16 pin OBD connectors, and there is an optional connector kit for all non 16 pin vehicles. Power is supplied from a 1530mAh Lithium-ion polymer battery pack that is charged by the supplied mains charger or through the diagnostic connector

A unique feature of the Diagon is its ability to scan and compare the live data stream of two identical vehicles at the same time.

Powerful diagnostic functions and convenient internet based software updates makes the Diagon the top choice for technicians.

Diagnostic functions

- Read/erase trouble codes
- View live data streams digitally or by wave form
- Component actuations
- Key coding
- Service resets
- Many special functions

X-431 Diagon Specification

- Windows CE 5.0 Operating system
- 400MHz ARM9 CPU
- 1Gb Micro-SD memory card
- Main unit operating voltage DC 5V
