

**ALL ADVANTAGES
AT A GLANCE**

- Directly on the monitor – no adapters required
- Digital display replaces physical targets
- Target library can be expanded through updates
- Reduced wear, no replacement costs
- Efficient and environmentally friendly

ADAS PRO+

ADAS Calibration

**SIMPLE
SET-UP**

**HIGH
PRECISION**

**CALIBRATION
DOCUMENTATION**

The ADAS PRO+ is a highly precise, professional calibration tool that meets the requirements of daily ADAS calibration work in both workshops and glass repair shops.

It consists of a base frame, wheel clamps, a laser distance meter, and a calibration target. It offers multi-directional fine adjustment - horizontally, front and rear, as well as right and left.

The X-431 ADAS PRO+ enables the calibration of FAS systems such as:

- Lane Keeping Assist
- Adaptive Cruise Control System
- 360° and Rear Camera
- Blind Spot
- Angle Assistant
- Night Vision System
- and much more

CALIBRATION RANGE INCLUDED & OPTIONAL

- **Adaptive cruise control**
- **Collision warning system**
- **Emergency braking assist***
- **Nightvision system***
- **Lane keeping assist**
- **Drive monitoring system***
- **Lane departure warning system**

*For some manufacturers, optional modules are required.
