

BST-360

Bluetooth Battery Tester

BST-360 IS A BLUETOOTH BATTERY TESTER SUITABLE FOR BOTH TECHNICIANS AND END USERS.

It is equipped with an advanced conductance testing function that accurately measures the vehicle battery's cold cranking amperage (CCA), providing reliable and informative results. It also displays the battery status and delivers a comprehensive evaluation of the vehicle's starting and charging systems.

The LAUNCH BST-360 enables precise and timely identification of charging system issues. Its compact, lightweight, and portable design is complemented by wireless Bluetooth technology, which can be paired with LAUNCH X-431 diagnostic devices.

ADDITIONAL INFORMATION AT A GLANCE

Bluetooth connection with X-431 devices, with automatic pairing

For 6 V / 12 V lead-acid batteries, AGM and GEL (30–80 Ah)

6 test modes: battery, voltage, current, cranking, charging system, and ripple voltage

Safe operation thanks to protection against overheating and reverse polarity

Supports battery standards: CCA, BCI, DIN, EN, SAE, and more

ALL ADVANTAGES AT A GLANCE

- Accurate and easy battery health testing for a wide range of vehicle types
- Test reports can be downloaded via smartphone or diagnostic device
- Stable Bluetooth connection with long operating range
- Compatible with the entire X-431 diagnostic tablet series
