CAT-601S

Transmission Fluid Exchanger

AUTOMATIC FLUID DETECTION
PRECISE FLOW MEASUREMENT

HIGH-PRECISION OIL EXCHANGE
ACCURATE FLUID REPLACEMENT

CYCLIC CLEANING
THOROUGH SYSTEM CLEANING

AUTOMATIC TRANSMISSION OIL FLUSHING AND EXCHANGE DEVICE, COMPATIBLE WITH X-431

The CAT-601S CleanGear is a professional automatic transmission fluid (ATF) flushing and exchange machine designed for fast, efficient and thorough transmission servicing. Featuring precise fluid measurement, a high-performance pump and an optional ATF database, it delivers accurate fluid replacement while helping to improve transmission performance and reduce wear.

Compatible with the X-431 diagnostic platform, the CAT-601S CleanGear supports remote monitoring and control for added convenience and workshop efficiency. Suitable for a wide range of automatic transmissions, it offers a reliable, user-friendly solution for modern vehicle maintenance.

TECHNICAL SPECIFICATIONS - CAT-601S

Power supply	AC 110 V / AC 220 V, 50 Hz/60 Hz
Maximum power	150 W
Exchange accuracy	± 100 ml
Power supply	DC 5V
Tank capacity	20 l
Temperature sensitivity	± 100 °C
Filtration accuracy	5 µm
Ambient temperature	-10 – 50 °C
Humidity	< 85%
Dimensions	590 x 700 x 1037

ALL ADVANTAGES AT A GLANCE

- Automatic fluid flow detection
- ATF database for precise fluid quantities
- Cyclic cleaning with cleaning agent for thorough system flushing
- Adjustable fluid level for precise filling
- Filter replacement reminder for reliable operation
- X-431 integration via CAT app
