

SMARTLINK B+C[®] Super Remote Diagnostic Solution

SMARTLINK B+C[®] – A NEW APPROACH TO REMOTE DIAGNOSTICS

The SMARTLINK B+C[®] Diagnosis system delivers advanced remote diagnostic capability designed to maximise workshop efficiency and technical reach. By enabling secure, real-time cloud-based communication, it allows technicians to diagnose and support vehicles remotely, reducing downtime and travel costs.

With OE-level access via PassThru and DoIP protocols, SMARTLINK B+C[®] supports accurate fault identification and manufacturer-standard repairs across a wide range of European vehicles. Its flexible design enables both workshop and remote applications, giving garages greater versatility in service delivery. Built for modern workshop demands, SMARTLINK B+C[®] enhances productivity, expands capability and provides fast access to expert remote support when needed.

ALL ADVANTAGES AT A GLANCE

- ✓ Remote real-time diagnostic support
- ✓ Increased workshop efficiency and time savings
- ✓ Direct connection to experts
- ✓ Flexible pay-per-use model

TECHNICAL SPECIFICATIONS	SMARTLINK C [®]	SMARTLINK B [®]
Display	3.97" touchscreen, 320 × 480	3.97" touchscreen, 320 × 480
Operating voltage	DC 9V ~ 36V	DC 9V ~ 36V
Communication	Wi-Fi (5 GHz) & Ethernet	Ethernet
USB	Type B USB 2.0	Type B USB 2.0
Storage	8 GB	8 GB
Memory	256 MB	256 MB
Power consumption	< 6 W	< 6 W
Operating temperature	-10°C ~ 50°C	-10°C ~ 50°C
Dimensions	204 × 110 × 45 mm	204 × 110 × 45 mm
