

## TWT-100

### Multifunctional trolley

The TWT-100 is a mobile workshop trolley designed to support diagnostic tools and battery chargers, making ECU programming and vehicle diagnostics more efficient in day-to-day workshop operations.

Ideal for use with the LAUNCH PFP-150 Battery Support Unit, the TWT-100 provides a convenient and flexible solution for ECU programming and routine diagnostic tasks. Featuring four spacious shelves and a lockable drawer, it offers ample storage for diagnostic equipment, ECU programming devices, and accessories. Four heavy-duty castor wheels provide smooth manoeuvrability, while integrated front and rear handles make it easy to move and position around the workshop.

PFP-150 Battery Support Unit and diagnostic tool shown are sold separately.
