

i-TPMS Sensor Programmer

The i-TPMS is an ideal workshop solution for fast, efficient diagnosis, programming, and management of TPMS sensors, helping reduce service time and improve workflow.

With seamless Bluetooth connectivity to LAUNCH X-431 diagnostic devices, it ensures quick, accurate communication with almost all TPMS sensors on the market.

This improves efficiency, reduces downtime, and supports more reliable, productive workshop operations.

MAXIMUM VEHICLE
COMPATIBILITY

SAFETY DATA: READS TYRE PRESSURE,
TEMPERATURE,
AND BATTERY STATUS.

X-431 INTEGRATION
COMPATIBLE WITH THE X-431
SERIES

i-TPMS TECHNICAL SPECIFICATIONS

Display	1.77" 168 x 128 px
Battery	3.000 mAh
OBDII input voltage	9V - 18 V
DC input voltage	DC 5V
Operating current	1A
Operating temperature	-10 - 50 °C
Communication	Bluetooth
Weight	450 g
Dimensions	252 x 54 x 30 mm

ALL ADVANTAGES AT A GLANCE

- Wireless programming for fast configuration
- Universal compatibility with TPMS sensors
- Supports over 98% of vehicle models
- Compatible with the X-431 series
- Read, program, and relearn in one device
- Accurate pressure data via RF transmission
