LAUNCH
UK & IRELAND

8 REASONS TO INVEST IN AN ADAS SYSTEM

1. **ADAS Is Now Standard** Most new vehicles include ADAS features. By 2030, nearly all cars on UK roads will require ADAS support.

2. **Stay Competitive** Offering calibration attracts high-value work and helps future-proof your garage.

3. **New Revenue Stream** Calibration is high-margin and creates opportunities with body shops, insurers, and windscreen specialists.

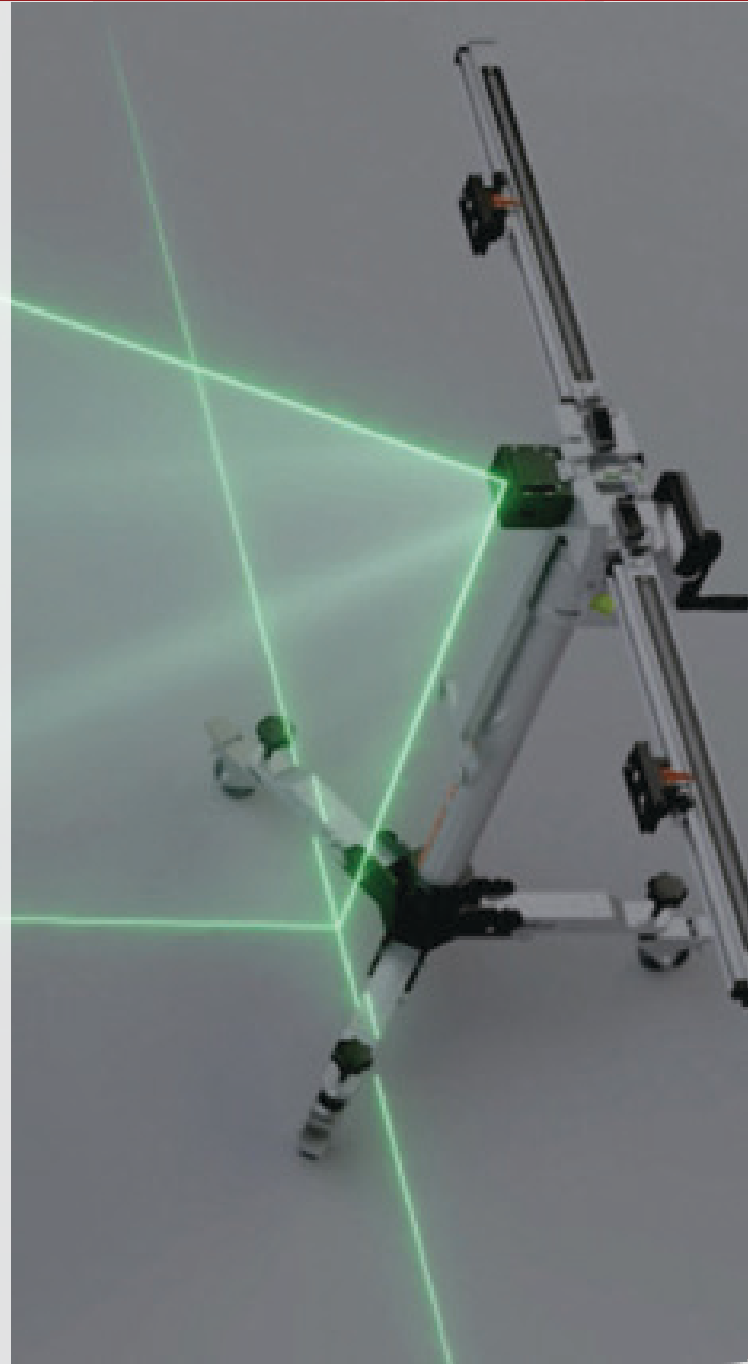

4. **Safety & Compliance** Correct calibration supports OEM and DVSA requirements and reduces safety risks.

5. **Meet Insurer/OEM Demands** Many insurers require calibration proof. In-house tools give full control and documentation.

6. **Reduce Delays** Avoid subcontracting, speed up turnaround times, and improve customer trust.

7. **Boost Efficiency** Recalibration is often needed after alignment or screen work. Doing it in-house improves workflow.

8. **Tax Benefits** ADAS equipment may qualify for capital allowances or full expensing.

- Contact our expert team to arrange a call-back or to book a demonstration with your nearest Area Sales Manager.
- Our ADAS and professional diagnostic equipment range is available exclusively through authorised resellers. Get in touch to find your nearest official supplier.
- Please be aware that cheaper online sellers on eBay or Amazon claiming to be official **LAUNCH** retailers do not provide UK warranty or technical support.

LAUNCH ADAS BUYING GUIDE

OPTION 1: LAUNCH ADAS 3 IN 1 RADAR KIT

Best for: Small workshops, mobile technicians, and businesses needing a low-cost radar calibration solution.

Features & Benefits

- Calibrates ACC, BSM, LCA and FCR in one compact kit.
- Works with major brands including Mercedes-Benz, BMW, Audi, Volkswagen, Toyota, Honda, Hyundai and Mazda.
- All components mount on a single frame, reducing setup time and saving workshop space.
- Operates as a fully standalone system with no additional hardware required.
- Supplied with essential tools such as a five-line laser, reflector, plumb line, brackets, measuring tape and positioning markers.
- Offers visual guidance with pre- and post-calibration reports for accuracy and record-keeping.

Ideal for:

Workshops expanding into cost-effective radar calibration
Businesses not yet requiring camera, lidar or night-vision capability

OPTION 2: LAUNCH ADAS MOBILE STANDARD

Best for: Windscreen technicians, mobile ADAS operators and general garages.

Features & Benefits

- Provides full camera calibration for LDW, AVM, BSD, RCW and basic NVS.
- Covers over 95% of camera-equipped vehicles. Includes basic ACC radar via supplied reflectors.
- Features a folding, portable frame ideal for mobile and on-site work.
- More affordable than the Ultimate model, with an easy, guided workflow suited to busy technicians.

Ideal for:

- High-volume windscreen and camera ADAS jobs.
- Vehicles produced between 2015 and 2022.
- Teams needing an affordable, full-camera calibration solution.

OPTION 3: LAUNCH ADAS MOBILE ULTIMATE

Best for: Dealerships, ADAS specialists, prestige repair centres and EV workshops.

Features & Benefits

- Includes everything in the Standard option plus full radar, lidar and night-vision calibration capability.
- Supports advanced systems including Bosch LRR/MRR, Toyota Sonar, Nissan ICC, and Audi/Toyota lidar, as well as NV targets for Mercedes, Lexus, Volvo, Volkswagen/Audi, and others.
- Equipped with professional alignment tools: five-line and cross-line lasers, digital protractor, auxiliary mirror and L- brackets.
- Designed for modern ADAS platforms from 2020–2026+.
- Provides dealer-level calibration precision and the highest earning potential through full-suite ADAS services.

Ideal for:

- Workshops servicing premium brands and advanced ADAS systems.
- Businesses needing complete, future-proof ADAS coverage.

LAUNCH ADAS 3 IN 1 KIT

ADAS 3 IN 1 KIT
£2,495
WEEKLY POA

LAUNCH ADAS 3 IN 1 KIT

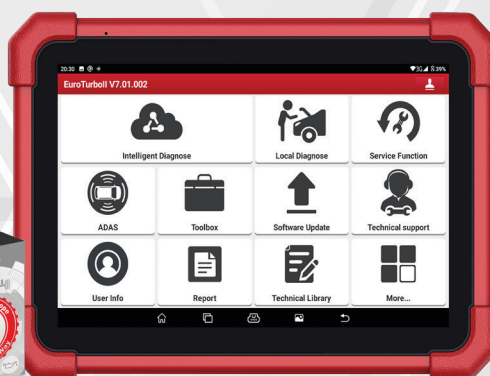

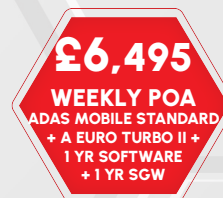

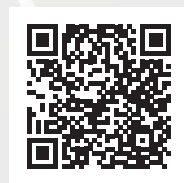

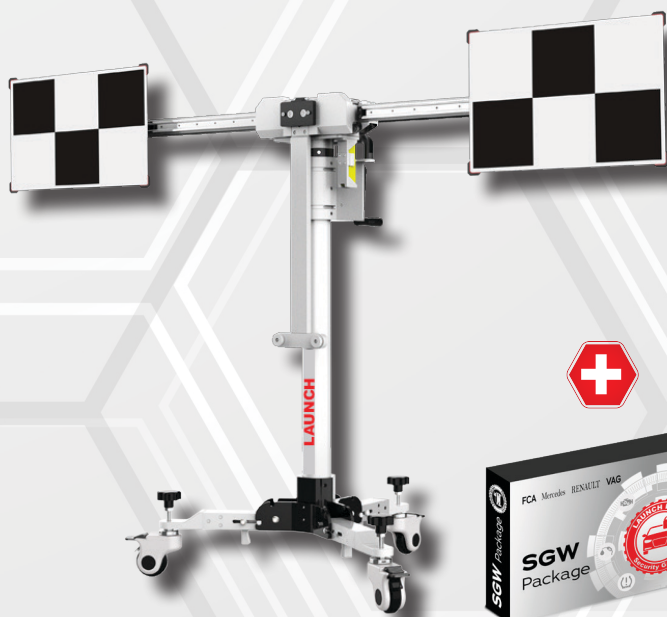

- **Cost-effective entry into ADAS radar:**
Offers an affordable way for workshops to expand from camera calibration into radar work.
- **Calibrates multiple radar systems in one kit:**
Provides ACC, BSM, LCA and FCR calibration without the need for separate tools.
- **Broad multi-brand compatibility:**
Works with leading vehicle manufacturers including Mercedes-Benz, BMW, Audi, Volkswagen, Toyota, Honda, Hyundai, Mazda and others.
- **Three tools combined on one frame:**
The radar target, corner reflector and Doppler simulator mount together, reducing setup time and saving workshop space.
- **Fully self-contained system:**
Operates independently with no additional hardware required, keeping costs down.
- **Guided calibration workflow:**
Features visual instructions and pre- and post-calibration reporting for accuracy and customer confidence.
- **Precision alignment tools included:**
Supplied with a five-line laser and laser reflector to ensure correct positioning.
- **Practical workshop accessories:**
Includes a plumb line, L-shaped bracket, measuring tape and positioning markers to support repeatable, reliable calibrations.
- **Organised, protected storage:**
Delivered in a robust case that keeps all components tidy and secure.
- **Ideal add-on for existing ADAS equipment:**
Enhances current camera-based setups by providing full radar calibration capability at minimal extra cost.
